

ROSHAN S

Full-Stack Developer · React · Next.js · TypeScript · Node.js · AI API Integration

roshan200628@gmail.com · +91 63823 52265 · Chennai, TN · linkedin.com/in/roshandev · github.com/Roshan282005 · portfolio-rozz.vercel.app

PROFESSIONAL SUMMARY

Final-year B.Tech IT student (CGPA 8.3/10, Anna University) with 2+ years shipping production full-stack apps. Secured a full-time offer at an IIT Delhi-incubated deeptech startup by delivering their company website solo — before graduation. Currently training intern batches in full-stack development while building AI-integrated internal tools and client systems. Targeting MNC SWE roles for production-ready, high-impact contribution.

TECHNICAL SKILLS

Languages: JavaScript (ES6+) · TypeScript · Python · PHP · Java · HTML5 · CSS3 · SQL
Frameworks: React.js · Next.js 14 · Node.js · Express.js · Tailwind CSS · Framer Motion · shadcn/ui
Databases: MySQL · MongoDB · Firebase · Supabase · Prisma ORM
Cloud & DevOps: AWS (Lambda · DynamoDB · CDK) · Vercel · GitHub Actions · n8n · Google Apps Script
AI & APIs: Anthropic Claude API · OpenAI API · Google Gemini API · Google Maps API · REST
Tools: Postman · Figma · XAMPP · Vite · Git

PROFESSIONAL EXPERIENCE

Full-Stack Developer & Trainer · Big Bucks Innovation (BBI) · IIT Delhi IHFC Pre-incubated Startup · Thoraipakkam, Chennai Feb 2026 – Present · 4 mos

- S+T: BBI had no digital presence before its IIT Delhi incubation launch; I was sole developer responsible for the full production website.
- A+R: Built Next.js 14/TypeScript/Tailwind site with dynamic MegaMenu, FounderSection & TeamSection; configured Vercel CI/CD + custom domain; resolved 350 MB Git cache corruption and CORS/dark-mode conflicts. Result: live production website (bigbucksinnovation.com); ~80% faster re-deployment turnaround.
- S+T: BBI scaled intern intake with no structured submission or evaluation infrastructure across 4+ technical domains.
- A+R: Built Google Apps Script multi-domain form automation; generated 10+ scoped project ideas; authored onboarding scripts and certificate workflows; debugged Apps Script API limits and WhatsApp formatting bugs. Result: fully operational intern program; first batch onboarded and trained while active dev work continued.
- S+T: ATS gap analysis on target MNC JDs identified 5 missing skills (AWS serverless, TypeScript rigor, laC, CDK, Jest) across 6 priority postings.
- A+R: Built TypeScript + AWS Lambda + API Gateway + DynamoDB + CDK URL shortener with Jest unit tests in a 2-day sprint. Result: Closed all 5 ATS gaps with a deployable, interview-demonstrable project.
- S+T: BBI teams managed job monitoring, calendars, and meeting notes manually across disconnected tools.
- A+R: Built 3 n8n workflows at big-bucks.app.n8n.cloud: WhatsApp→Calendar sync, job portal→Slack digest, Google Meet→GitHub Gist transcripts. Result: Eliminated repetitive manual tracking; zero-touch meeting documentation and job alerts.

KEY PROJECTS

ARIZE — LLM Inference & Chat Platform | Next.js · TypeScript · FastAPI · vLLM · Three.js · Canvas API · Anthropic API 2025

- S+T: No viable self-hosted LLM inference platform existed at sub-commercial scale for BBI's AI research needs.
- A+R: Architected Next.js→FastAPI→vLLM pipeline with Anthropic API fallback; built Canvas liquid animation UI + Three.js water backgrounds; integrated Prompt Enhancement engine & multi-model switching (Ollama/Gemini/custom). Result: Functioning prototype with publicly demonstrated immersive UI on LinkedIn.

TravelGo — AI Travel Booking Platform | PHP · MySQL · JS · Claude AI API · Google Maps API 2024–2025

- S+T: Travel booking required heavy manual effort; OpenAI integration had cost and reliability issues.
- A+R: Built full-stack booking system with flight search/booking modules; migrated chatbot from OpenAI→Claude API; resolved Google Maps CORS + XAMPP port conflicts. Result: 40% faster booking flow; env setup cut from 2 hrs to 15 min.

Rizz — AI Social Media Platform | HTML · CSS · JS · Python · PHP · MongoDB Feb 2025

- S+T: Needed to demonstrate real-time AI content categorisation and sub-100ms feed queries at scale.
- A+R: Designed indexed MongoDB schema; built AI post-categorisation pipeline (85% topic-match accuracy across 5 categories); fully responsive 320px–1440px UI. Result: Sub-100ms feed latency; 85% categorisation accuracy in internal testing.

Aero Nimbus — Airline Reservation System | PHP · MySQL · JS · HTML5 · CSS3 2024–2025

- S+T: Inherited a codebase with 12+ critical JS/CSS legacy errors leaving the booking workflow non-functional.
- A+R: Diagnosed and fixed all 12+ errors in 3 days; built SVG seat-selection map and 4-step booking workflow; added indexed MySQL query lookups. Result: Full functionality restored in 3 days; 60% faster queries on 10k-row dataset.

ANNAM — SaaS Food Delivery Architecture | Next.js · Firebase RTDB · Razorpay · Zustand · React Query · Figma 2025

- S+T: Needed a portfolio-grade system design artifact targeting MNC system design interview rounds.
- A+R: Designed 4-app monorepo (customer/restaurant/delivery/admin) with Firebase RTDB GPS, Razorpay, Google Places, Zustand+React Query; produced complete Figma spec + 8-week MVP sprint plan. Result: Architect-level system design document demonstrating distributed real-time system thinking.

EDUCATION & CERTIFICATIONS

B.Tech — Information Technology, Anna University (MNMJEC, Chennai) CGPA 8.3/10 Expected May–Jun 2027
Certifications: Java Selenium & Full-Stack Java (Greens Technology, 2024) · Web Development — Web Designer (Elewayte, 2024) · C & C++ Programming (CSS Computer Education, 2023)

LEADERSHIP & ACTIVITIES

- NSS — Coordinated 5+ community outreach drives benefiting 200+ individuals (Feb 2024–Present)
- Rotaract Club — Contributed to 3+ leadership workshops and social-impact events, strengthening cross-functional communication (Aug 2024–Present)

Open to full-time SWE roles · Available May/Jun 2027 · Actively freelancing
